OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Riley in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections. The MCX did not physically verify the existence of collections and, as such, the information contained in this report is based on background record reviews and information obtained via telephone interviews with the aforementioned installation personnel and institution professionals.

Archival research for Fort Riley began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Kansas State Historical Society, Archaeology Department. The records search was performed in April 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT RILEY

Archaeological work on Fort Riley began in the 1930's with the excavation of an aboriginal village site, 14RY21, by the United States National Museum, under the direction of Waldo R. Wedel. This excavation was conducted in conjunction with a survey of the northeastern portion of the state of Kansas (Wedel 1938:120). Since this investigation, numerous other groups have performed archaeological investigations at Fort Riley, continuing to the present day. Since 1966, nine groups have performed archaeological investigations at Fort Riley:

Fort Riley, Environmental Office,
Geo-Marine, Plano, Texas,
Kansas State Historical Society, Topeka,
Kansas State Historic Preservation Office, Topeka,
Kansas State University, Manhattan,
Louis Berger & Associates, Inc., Washington D.C.,
U.S. Army Corps of Engineers Research Laboratory (CERL), Champaign, Illinois,
University of Illinois, Public Service Archaeology Program, Champaign, and
Wichita State University, Wichita, Kansas

Approximately 29 archaeological projects are believed to have been undertaken on Fort Riley. Archeological collections were recovered from 20 of these projects. Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 241 ft³ of boxed archaeological materials and associated documentation has been identified for Fort Riley. Artifact collections generally consist of prehistoric ceramics, non-diagnostic lithic materials, animal bone, historic ceramics, glass, leather, brick, and metal items. In addition, Native American skeletal remains were collected from site 14GE347 (see below for details).

As of the date of this report, the Fort Riley collections are located in the following repositories:

Fort Riley, Environmental Office	7.25 ft ³ of artifacts
U.S. Calvary Museum, Fort Riley	1 ft ³ of boxed artifacts
Kansas State University, Manhattan	215 ft ³ of boxed artifacts
Fort Larned National Historic Site, Larned, Kansas	169 glass bottles
Wichita State University, Kansas	1 ft ³ of boxed artifacts
U.S. Army Construction Engineering Research Laboratory, Champaign, Illinois	10 ft ³ of artifacts
Geo-Marine, Inc., Plano, Texas	<1 ft ³ of artifacts
Kansas State Historical Society, Topeka	4 ft ³ of artifacts
Unmarked Grave Preservation Board Facility, Kansas State Historical Society, Topeka	1 ft ³ of boxed human remains
U.S. National Museum, Division of Archaeology, Smithsonian Institution, Washington, D.C.	undetermined

The attached *Summary of Current Locations of Archaeological Collections from Fort Riley* (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts, and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well. Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

The Native American ethnographic collections at the Fort Riley U.S. Calvary Museum are accessioned by the museum and thus are part of the Center for Military History's NAGPRA Compliance project. However, the archaeological collections are not accessioned into the Museum's collections and are the responsibility of Fort Riley Environmental Office.

Two ft³ of historic ceramics and glass from a 1992 survey on Fort Riley performed by the University of Illinois Public Service Archaeology program are currently held at CERL in Champaign pending completion of a recent project. However, according to John Dendy, Fort Riley Archaeologist, these materials were expected to be sent by the end of November 1995, to the Environmental Office on Fort Riley for storage (telephone conversation, 2 November 1995).

Collections at the Smithsonian Institution

An undetermined quantity of artifact material is also believed to be housed at the Smithsonian Institution, Washington, D.C. This collection was recovered from the prehistoric village site 14RY21 on Fort Riley, and was excavated during the summer of 1937 by Waldo R. Wedel of the United States National Museum. Materials believed to be included in this collection are cord-roughened grit-tempered pottery, projectile points, scrapers, a cupstone, and a mealing slab (Wedel 1938:125). The Smithsonian Institution has indicated that it shall be responsible for all NAGPRA reporting and inventory of its archaeological collections, and at present, both the quantity and types of materials contained in the site 14RY21 collection are undetermined.

NAGPRA-Related Collections

A human "calva" (possibly referring to a calvarium) was reported as being recovered from site 14GE347. This human skeletal element is being retained at the Unmarked Burial Preservation Board Facility, located at the Kansas State Historical Society, Topeka, Kansas. Although the Unmarked Preservation Board has accepted this human element into their possession, ownership and NAGPRA compliance remain the responsibility of the U.S. Army.

Recently, a Potawatomi rattle and a scalp-lock identified as belonging to the Lakota Sioux were identified among the U.S. Calvary Museum collections. NAGPRA compliance for these materials is the responsibility of the Center for Military History and they are not included within the MCX project for the Army.

The final examination of sacred objects or objects of cultural patrimony may be established through consultation with Native American tribes or individuals that have met the definition of culturally affiliated tribes and/or lineal descendants and for the objects specified by law in NAGPRA.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

One set of references regarding archaeological work conducted on Fort Riley is attached: Appendix IV contains the list of references reviewed by the MCX during its archival research at Kansas State Historical Society, Archaeology Department. A literature search on the National Archaeological Database System did not provide any references for Fort Riley.

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT RILEY

The cultural affiliation for the archaeological artifacts collected from Fort Riley was not stated in the reports or site files, however there is ethnographic and archaeological evidence of prehistoric and historic Native American occupation of the area. Lucy Whalley, an ethnographic consultant contracted by Fort Riley from the U.S. Army Corps of Engineers Construction Engineering Research Laboratory (CERL), sent letters to 23 Native American tribes to initiate potential consultation on a wide range of issues pertinent to the Fort's mission. Six tribes responded to the original letters. Since then, three tribes that aboriginally resided near the fort and one that moved through the area during relocation, have engaged in consultation with Fort Riley regarding NAGPRA issues. The Native American groups that apparently resided aboriginally near the Fort Riley area are the Kansa (or Kaw) (Unrau 1994:285), the Osage (Wilson 1994:411-412), and the Pawnee (Waldman 1988:179; Blaine 1994:437). The Ponca were moved through Fort Riley from Nebraska on the way to relocation in Oklahoma (John Dendy, telephone conversation, 24 March 1995). Additional detail for each of these groups is provided below.

The Kaw, also known as the Kansa, arrived in northeast Kansas from the Lower Ohio Valley sometime around the mid-sixteenth century and it was here that they lived as prairie villagers until the early 1800's (Waldman 1988:109; Unrau 1971:13). In 1819, Major Stephen H. Long reported visiting the Kansa's Blue Earth village, which was historically located within ten miles to the east of Fort Riley's present location (Unrau 1971:99). From 1820 to 1846, the Kaw were forced to relinquish most of their lands in Kansas and Nebraska to the Euroamerican settlers. In 1846, after their original land holdings had so diminished, the Kaw were assigned a reservation at Council Grove, Kansas, on the Neosho River, 30 miles southeast of Fort Riley (Waldman 1988:109). In 1873, due to white settlement and intrusion of the Union Pacific railroad, the Council Grove reservation was sold and the Kaw were moved to the Kaw Indian Reservation in Osage County, Oklahoma where they reside today (Unrau 1994:285; Unrau 1971:215).

The Osage are thought to have originated in the Ohio River Valley prior to immigrating into the eastern edge of Kansas around A.D. 1500 (O'Brien 1994:219; Waldman 1988:39; Wilson 1994:411-412). The Indian Land Claims cases acknowledged the Osage claim to aboriginal territory in the area where the states of Kansas, Oklahoma, Arkansas and Missouri adjoin (U.S.G.S. n.d.). In 1825, a treaty ceded the remainder of the Osage lands in Missouri to the United States and gave the Osage a reservation in the extreme south of Kansas territory where they lived until 1870 (Chapman 1974:99). However, in 1870 their Kansas reservation was also given up by treaty and the last of the Osage in Kansas were moved their present reservation in northeastern Oklahoma (Chapman 1974:100; Wilson 1994:411-412).

Aboriginally, members of the Caddoan linguistic family migrated northward from what is now Texas, first to the Red River region of southern Oklahoma, and then to the Arkansas River

region of northern Oklahoma and southern Kansas (Waldman 1988:179; Gunnerson 1987:262). Based on the language evolutionary theories (glottochronology) of Swadesh, and Caddoan archaeological interpretations of J. Hughes, it is believed that the original separation between Woodland and Plains Caddoans took place about 1500 B.C. (Hughes 1969: 86). Because all Caddoans originated in the lower Mississippi Valley, the expansion of Plains Caddoan groups along river systems into the grasslands must have begun during Late Archaic time but continued into the late prehistoric period (Schlesier 1994:347). It was these people, ancestors to the Pawnee, who continuing their migration north eventually settled along the Loup River in Nebraska (Gunnerson 1987:74). In 1792-1793, Pedro Vial visited a Pawnee village near the present location of Republic, Kansas, 80 miles northwest of Fort Riley. This site, known as the Kansas Monument site, was occupied by the Republican Pawnee from 1775 to 1800 and/or 1821-1833 (Gunnerson and Gunnerson 1988:22). In response to the 1805 Treaty of Table Rock, and the threat of hostilities from the Sioux, all of the Pawnee were removed to Genoa, Nebraska where they remained on a reservation until 1876, when they were moved to a reservation in Oklahoma (Gunnerson and Gunnerson 1988:26).

The Ponca originated from the middle Mississippian culture of the Ohio Valley (Waldman 1988:196). The Ponca and their close relatives, the Omaha, probably appeared together on the northeastern Plains around A.D. 1200 to 1300. They subsequently separated and the Ponca settled near what is now Niobrara, Nebraska. In 1876, the Ponca were forced to relocate to the Indian Territory in Oklahoma, passing through Kansas near Fort Riley, on their way south (Ritter 1994:459). Some of the Poncas, led by Chief Standing Bear, passed through Kansas again in 1879 while on their way back to Nebraska to bury the chief's son in their ancestral homeland along the Niobrara River (Waldman 1988:196).

Through several telephone conversations between Fort Riley's archaeologist, John Dendy, and MCX staff, the preceding Native American tribes have been identified as potentially culturally affiliated with the area occupied by Fort Riley. These four tribes, with the addition of the Tonkawa, have formed an intertribal community for many actions, although it appears that repatriation and future Memoranda of Agreement or Understanding may be handled by the tribes individually (John Dendy, telephone conversation, 24 March 1995).

Points of contract for the federally recognized Kaw, Osage, Pawnee, and Ponca tribes are provided in Appendix II.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed is a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR FORT RILEY, KANSAS

[Installation Header]

Ms. Wanda Stone, Chairperson
Kaw Executive Council
Drawer 50
Kaw City, OK 74641

Dear Ms. Stone:

I am writing to inform you of collections held by Fort Riley that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Kaw. Fort Riley has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Riley is responsible for collections that include approximately 241 ft³ of artifacts housed at nine known repositories. The majority of the archaeological material is currently at Kansas State University, Manhattan, Kansas. These archaeological collections were generated from surveys, testing, and excavations conducted from the 1930's to the present. The collections consist of prehistoric ceramics, non-diagnostic lithic materials, animal bone, and historic ceramics, glass, leather, brick, and metal items. Associated documentation such as field notes, reports, and correspondence are also part of the collections. Additionally, a human skeletal element is included in one of these collections: A human calvarium was recovered from a gravel bar on the Republican River channel in 1990 by Tom Witty, State Archaeologist.

We are notifying the Kaw because some of these materials were found in or near the area thought to be part of the territory occupied or used aboriginally by the Kaw.

In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing the Section 6 Summary, a potential Native American skeletal element was identified from a site on Fort Riley; an archaeological collection was generated from this site, 14GE347. The Human skeletal element collected from this archaeological site on Fort Riley property is reportedly housed at the Unmarked Burial Preservation Board Facility, at the Kansas State Historical Society, Topeka, Kansas. We are also notifying the federally recognized tribes of the Osage, the Pawnee, and the Ponca.

Therefore, by means of this letter we are also initiating consultation regarding the potential NAGPRA Section 5 Inventory. Fort Riley is scheduled to conduct our Section 5 Inventory investigations of the human skeletal element in 1996. If the Kaw wish to comment on, or participate in, the Section 5 Inventory investigations, please respond as soon as possible.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Riley and the Kaw on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

[Installation Header]

Mr. Alex Matthews, President
Pawnee Tribe of Oklahoma
P.O. Box 470
Pawnee, OK 74058

Dear Mr. Matthews:

I am writing to inform you of collections held by Fort Riley that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Pawnee. Fort Riley has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Riley is responsible for collections that include approximately 241 ft³ of artifacts housed at nine known repositories. The majority of the archaeological material is currently at Kansas State University, Manhattan, Kansas. These archaeological collections were generated from surveys, testing, and excavations conducted from the 1930's to the present. The collections consist of prehistoric ceramics, non-diagnostic lithic materials, animal bone, and historic ceramics, glass, leather, brick, and metal items. Associated documentation such as field notes, reports, and correspondence are also part of the collections. Additionally, a human skeletal element is included in one of these collections: A human calvarium was recovered from a gravel bar on the Republican River channel in 1990 by Tom Witty, State Archaeologist.

We are notifying the Pawnee because some of these materials were found in or near the area thought to be part of the territory occupied or used aboriginally by the Pawnee.

In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections. We are also notifying the federally recognized tribes of the Kaw, the Osage, and the Ponca.

In the process of completing the Section 6 Summary, a potential Native American skeletal element was identified from a site on Fort Riley; an archaeological collection was generated from this site, 14GE347. The human skeletal element collected from this archaeological site on Fort Riley property is reportedly housed at the Unmarked Burial Preservation Board Facility, at the Kansas State Historical Society, Topeka, Kansas. We are also notifying the federally recognized tribes of the Kaw, the Ponca, and the Osage.

Therefore, by means of this letter we are also initiating consultation regarding the potential NAGPRA Section 5 Inventory. Fort Riley is scheduled to conduct our Section 5 Inventory investigations of the human skeletal element in 1996. If the Pawnee wish to comment on, or participate in, the Section 5 Inventory investigations, please respond as soon as possible.

Ponca Business Committee
P.O. Box 2, White Eagle
Ponca City, OK 74601

Dear Ms. Pollak:

I am writing to inform you of collections held by Fort Riley that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Ponca. Fort Riley has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Riley is responsible for collections that include approximately 241 ft³ of artifacts housed at nine known repositories. The majority of the archaeological material is currently at Kansas State University, Manhattan, Kansas. These archaeological collections were generated from surveys, testing, and excavations conducted from the 1930's to the present. The collections consist of prehistoric ceramics, non-diagnostic lithic materials, animal bone, and historic ceramics, glass, leather, brick, and metal items. Associated documentation such as field notes, reports, and correspondence are also part of the collections. Additionally, a human skeletal element is included in one of these collections: A human calvarium was recovered from a gravel bar on the Republican River channel in 1990 by Tom Witty, State Archaeologist.

We are notifying the Ponca because historically it is believed that they moved through the territory from which these material were found during relocation to Oklahoma.

In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections. We are also notifying the federally recognized tribes of the Kaw, the Osage, and the Pawnee.

In the process of completing the Section 6 Summary, a potential Native American skeletal element was identified from a sites on Fort Riley; an archaeological collection was generated from this site, 14GE347. The human skeletal element collected from this archaeological site on Fort Riley property is reportedly housed at the Unmarked Burial Preservation Board Facility, at the Kansas State Historical Society, Topeka, Kansas. We are also notifying the federally recognized tribes of the Kaw, the Osage, and the Pawnee.

Therefore, by means of this letter we are also initiating consultation regarding the potential NAGPRA Section 5 Inventory. Fort Riley is scheduled to conduct our Section 5 Inventory investigations of the human skeletal element in 1996. If the Ponca wish to comment on, or participate in, the Section 5 Inventory investigations, please respond as soon as possible.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Riley and the Ponca on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT RILEY, KANSAS

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR: The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

1 cu. ft. (8 Boxes)	Lithics, Ceramics, Daub, Glass, Metal, Plastic	Prehistoric Middle Ceramic, Smoky Hill Habitation; Historic	Not Listed		None Identified

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
